Driver Licence

Education

Master's in Computer Science – École Polytechnique, Paris

09/2019 – 06/2021

Specialization in Distributed Systems and Cloud Computing. GPA: 3.8/4.0. Thesis on microservices architecture optimization.

Bachelor's in Engineering – Université Paris-Tech

09/2016 – 06/2019

Major in Software Engineering. Recipient of the Academic Excellence Scholarship. Completed internship at leading tech company.

Academic Projects

Distributed Task Scheduler

Team of 4 – 6 months – Python, Docker, Kubernetes

Developed a high-performance task scheduler for distributed computing. Optimized throughput by 40% through load balancing algorithms. Containerized with Docker and orchestrated using Kubernetes.

Real-time Data Pipeline

Lead Developer – Team of 3 – 4 months – Kafka, Spark, Python

Architected and implemented a real-time data processing pipeline handling 500K events per second. Implemented fault tolerance and auto-scaling mechanisms.

Compiler Optimization Project

3 months – Solo project – C++, LLVM

Built compiler optimizations for functional languages. Achieved 25% improvement in code generation efficiency.

Cloud Cost Analytics Dashboard

Full-stack Developer – Team of 2 – 5 months – React, Node.js, PostgreSQL

Created an analytics platform for monitoring AWS costs in real-time. Helped organization reduce cloud spending by 20%.

Experience

Senior Software Engineer – TechCorp SAS

03/2023 – Present

Led development of microservices architecture serving 2M+ users. Mentored 3 junior engineers. Reduced API latency by 35% through optimization work.

-> Key skills acquired: Kubernetes, gRPC, Performance tuning, Team leadership

Software Engineer – CloudSys GmbH

07/2021 – 02/2023

Developed backend services using Go and Python. Implemented CI/CD pipelines with GitLab CI. Contributed to 4 major product releases.

-> Key skills acquired: Go, PostgreSQL, Cloud DevOps, Agile methodologies

Software Engineering Intern – Innovate Labs

06/2020 – 08/2020

Developed features for internal data platform. Fixed 15+ bugs reported by QA team. Earned full-time offer upon graduation.

-> Key skill acquired: Java, Software testing, Professional development

Strengths

Problem-solving, System design, Leadership, Attention to detail, Communication

Skills

Programming Languages

- Python, Go, Java, C++
- Rust
- JavaScript

DevOps & Cloud

- Docker - Kubernetes, Docker Compose
- AWS - CI/CD, GitHub Actions
- CI/CD pipelines - GitLab, Jenkins
- Git version control

Databases & Backend

- PostgreSQL, MongoDB, Redis - SQL optimization
- RESTful APIs - gRPC
- System design and scalability - Microservices pattern

Systems & Tools

- Linux/Unix
- Agile/Scrum
- Technical documentation

Currently Learning

- Machine Learning basics
- WebAssembly

Languages

French

Native speaker

English

Fluent (C1)
TOEIC: 920/990

German

Intermediate (B1)

Interests

Open Source Contributions

Active contributor to Kubernetes and Prometheus projects

Technology Blogging

Write technical articles on distributed systems and cloud architecture

Rock Climbing

Weekend climber, completed several outdoor climbing routes
