PROFESSIONAL SUMMARY

Software engineer specialised in cloud architecture and distributed systems, currently leading microservices development at TechCorp SAS. Background spanning backend engineering, DevOps and large-scale system design, with a focus on performance, reliability and team leadership.

EDUCATION

- École Polytechnique, Paris**
Master's in Computer Science • Paris, France
Specialisation in Distributed Systems and Cloud Computing. GPA: 3.8/4.0. Thesis on microservices architecture optimization.
- Université Paris-Tech**
Bachelor's in Engineering • Paris, France
Major in Software Engineering. Recipient of the Academic Excellence Scholarship. Completed internship at leading tech company.

PROFESSIONAL EXPERIENCE

- Senior Software Engineer**
TechCorp SAS • France
Led development of microservices architecture serving 2M+ users. Mentored 3 junior engineers. Reduced API latency by 35% through optimization work.
Skills: Kubernetes · gRPC · performance tuning · team leadership.
- Software Engineer**
CloudSys GmbH
Developed backend services using Go and Python. Implemented CI/CD pipelines with GitLab CI. Contributed to 4 major product releases.
Skills: Go · PostgreSQL · cloud DevOps · Agile methodologies.
- Software Engineering Intern**
Innovate Labs
Developed features for internal data platform. Fixed 15+ bugs reported by QA team. Earned full-time offer upon graduation.
Skills acquired: Java · software testing · professional development.

PROJECTS

- Distributed Task Scheduler** – Academic - Python, Docker, Kubernetes
Team of 4 over 6 months. High-performance task scheduler for distributed computing. Optimised throughput by 40% through load balancing algorithms. Containerised with Docker and orchestrated using Kubernetes.
- Real-time Data Pipeline** – Academic - Kafka, Spark, Python
Lead developer, team of 3, over 4 months. Real-time data processing pipeline handling 500K events per second, with fault tolerance and auto-scaling mechanisms.
- Compiler Optimization Project** – Academic - C++, LLVM
Solo project over 3 months. Compiler optimisations for functional languages, achieving a 25% improvement in code generation efficiency.
- Cloud Cost Analytics Dashboard** – Academic - React, Node.js, PostgreSQL
Full-stack developer, team of 2, over 5 months. Analytics platform for monitoring AWS costs in real time, helping reduce cloud spending by 20%.

AREAS OF EXPERTISE

- Skills**
Problem-solving · System design · Leadership · Attention to detail · Communication
- Tools**
Docker · Kubernetes · AWS · Git · GitLab CI · Jenkins · Linux/Unix
- Programming**
Python · Go · Java · C++ · PostgreSQL · MongoDB · Redis · SQL optimisation · Microservices architecture · RESTful APIs · gRPC
- Currently Learning**
Rust · Machine Learning basics · WebAssembly

LANGUAGES

- French**
Native speaker
- English**
C1 – TOEIC 920/990
- German**
B1

INTERESTS

- Open Source** : Active contributor to Kubernetes and Prometheus projects.
- Technology Blogging** : Writes technical articles on distributed systems and cloud architecture.
- Rock Climbing** : Weekend climber, completed several outdoor climbing routes.
